

College

Moving forward

- Current situation → no long-term future
- College felt like the only route forward
- Friends/acquaintances all had plans ...
- Didn't collect GCSEs
- Missed application deadline → Managed to get a place
- Lived on a boat
- Worked & Studied
- Finished with half sharp grades (good enough for uni)

University

Winging it ...

- After college, I continued to work at the bike shop
 - Spent the summer driving around the UK (buying, selling, collecting, delivering bikes)
- No idea what to study - Only really knew motorbikes and bricklaying
- Not convinced I was built for uni
- A friend was studying Computer Science
- Long nights on the boat → needed a change
 - Didn't even like computers, but ... thought I could wing it
 - Learned as I went
