

Industry

Integral - where I really learned development

- SW Developer ~8 years
- Small company, small team ~12 people
- Built server monitoring tools used worldwide
- Hands-on with everything
- Learned fast (most of what I know re SW Dev)
 - Intense, but valuable
- Long hours ~14-hour days and most Saturdays
- Lots of pressure, if we didn't deliver the company did not earn...

Priorities changed

Breaking point

- Young family
 - Wasn't just about me anymore
- Current situation a was no longer sustainable
- Partner's job is not flexible/family-friendly
- Needed balance and more stability
- Something had to change
