

University

Winging it ...

- After college, I continued to work at the bike shop
 - Spent the summer driving around the UK (buying, selling, collecting, delivering bikes)
- No idea what to study - Only really knew motorbikes and bricklaying
- Not convinced I was built for uni
- A friend was studying Computer Science
- Long nights on the boat → needed a change
 - Didn't even like computers, but ... thought I could wing it
 - Learned as I went

A turning point

Germany was never part of the plan

- Opportunity during BSc → HP Work Placement (14 months)
- Good excuse to get away - new country
- Permanent Job Offer after BSc
 - Meant no UK job hunt
 - Master's while working at Integral
 - Planned to stay for max 2 years
 - Packed a rucksack and rode to Germany
